INVESTMENT IN PEOPLE

“We are glad to be part in solving social problems. In terms of community, we are delighted to be able to contribute to people’s knowledge, career, income and self-reliance.”

“Chow Sharing and Giving Brick”

The goal and mission of the project is to build a knowledge base for the community to generate income and strengthen the community. The company has been meeting with the community unit we know the need to help. We have already considered the potential of the organization to sustainably sustain the community. Indeed, this project is due to the fact that waste is being recycled from the

production process and eventually become a viable product. Troubleshoot issues with the community. Brick paving the product is made from sand components that are degraded from the manufacturing process, providing exceptional flexibility and fire resistance. Bring the brick from the project to the standards of the relevant Government agencies, the results are satisfactory. The price is also competitive. Importantly, all revenue from the sale is for the community to be managed to be sustainable.
